Palladium catalysed cross-couplings reactions have been a dominant method in large scale manufacturing processes have cross-coupling chemistry at their core. . . purposes which of course is also controlled by the polarity of the solvent. . Note that the popular palladium on carbon (Pd/C) is an ill-specified mixture of .

Pretze M. Because of its functional group-tolerating character, mostly mild reaction conditions and short synthesis times, this kind of coupling reaction represents a valuable and multifunctional tool not only regarding the preparation of the precursor core.
